FOR IMMEDIATE RELEASE

IVS 3D LAUNCHES CERTIFIED TRAINING CENTER

Acoustic Imaging Pty Ltd as newest Certified Training Center for Pacific region

Portsmouth, NH USA- April 1, 2006- IVS 3D announced the certification of Dr Douglas Bergersen, Director of Acoustic Imaging (AI), as their certified instructor in the Pacific region for the award winning Fledermaus software suite.

IVS Director of Sales and Marketing, Bill McKernan, stated, "As technology advances our clients require a knowledgeable resource that not only understands the capability of the entire Fledermaus suite, but also has the experience in the ocean industry that enables them to understand the clients needs and goals. This combination is essential for any of our certified support and training centers. The combined expertise at Acoustic Imaging is exactly what our clients in the Pacific region are looking for. We look forward to accelerated growth in this region due to partners like Acoustic Imaging."

Acoustic Imaging's mandate is to offer innovative solutions to marine geophysical projects active in Austral-Asia region. The company, along with QSea Innovations Pty Ltd, introduced the Triton Isis product to the Australian oil and gas market, and were one of the first groups to extensively use digital high resolution marine geophysical data to view and understand the seabed (i.e., in the form of mosaics and fused imagery from the seabed and subsurface). Dr. Bergersen graduated from the University of Hawaii with a MSc. and Ph.D in Marine Geology and Geophysics, and then migrated to Australia where he has worked in the offshore industry since 1995. Of the new relationship with IVS, he stated, "Acoustic Imaging continues to expand on our mission statement of introducing innovative solutions to the Austral-Asia market. The powerful data visualization, analysis, and processing capabilities of Fledermaus compliment the extensive knowledge base of marine operations obtained from participating and managing offshore surveys for the past 20 years. Acoustic Imaging offers a practical blend of offshore experience with industry-leading tools for total survey / system solutions. Our highly qualified staff and consultants look forward to moving the industry in exciting new directions."

Acoustic Imaging is located in Pretty Beach, NSW, Australia, approximately 1 hour from the Sydney CBD. For more information visit their website at: <http://www.acousticimaging.com/>.

Interactive Visualization Systems' (IVS3D) Fledermaus software suite provides users with a powerful set of interactive 3D visualization tools for data preparation, analysis and presentation. Fledermaus allows users near real-time, interactive 3D display of very large complex scenes at their full resolution. Users rapidly gain insight and extract more information from their combined data (data sets such as multi-beam, LIDAR, magnetic and gravity, in fact any surface data that has an x, y, z, variables format).
