FOR IMMEDIATE RELEASE

IVS 3D LAUNCHES CERTIFIED TRAINING CENTER

MosaicHydro as newest Certified Training Center in the Pacific-Northwest region

Portsmouth, NH USA- September 11, 2007- IVS 3D announced the certification of Mike Brissette, President of MosaicHydro, as their certified instructor in the Pacific Northwest region for the award winning Fledermaus software suite.

IVS VP of Sales and Marketing, Bill McKernan, stated, "As technology advances our clients require a knowledgeable resource that not only understands the capability of the entire Fledermaus suite, but also has the experience in the ocean industry that enables them to understand the clients needs and goals. This combination is essential for any of our certified support and training centers. The combined expertise at MosaicHydro is exactly what our clients in the Pacific-Northwest region are looking for. We look forward to accelerated growth in this region due to partners like MosaicHydro."

Mosaic Hydrographic Services (Canada) Ltd is a hydrographic consulting company that specializes in assisting clients with multibeam and sidescan sonar training, both in class and on the water. MosaicHydro also assists clients with needs assessments, Mine Counter Measures and harbour security training, general hydrographic training, hydrographic data post-processing, and provides field personnel for survey operations. MosaicHydro's President, Mike Brissette, is a UNB Ocean Mapping Group graduate, and a 20-year veteran of the Canadian Navy having specialized as a Route Survey Officer.

Since 2004 MosaicHydro has delivered training courses to the Canadian Navy, NOAA, the Canadian Hydrographic Service and personnel from India's NIOT. MosaicHydro has provided field survey personnel to international countries in support of UNCLOS surveys as well as personnel in support of environmental surveys, Oil & Gas projects, and cable route surveys. Starting in spring 2008, MosaicHydro will be offering multibeam operator training courses in Victoria, BC for field personnel requiring entry level training.

MosaicHydro is located in Victoria, BC, on Canada's west coast central to the Pacific Northwest survey market. For more information visit their website at: <http://www.mosaichydro.com/>.

Interactive Visualization Systems' (IVS3D) Fledermaus software suite provides users with a powerful set of interactive 3D visualization tools for data preparation, analysis and presentation. Fledermaus allows users near real-time, interactive 3D display of very large complex scenes at their full resolution. Users rapidly gain insight and extract more information from their combined data (data sets such as multi-beam, LIDAR, magnetic and gravity, in fact any surface data that has an x, y, z, variables format).
